

## **Road Safety**

Road safety is a topic of utmost importance and imparting knowledge about it to children is essential to ensure their safety and well – being.

To make the students aware of traffic rules and safety measures that we should take while moving on the road “Road Safety Month” was observed in Pawar Public School, Nanded City, Pune.

By employing experiential learning techniques in a play way method, the school aims to equip students with the necessary skills and knowledge to navigate road safety.

During this ‘Road Safety Month’ teachers conducted various activities related to road safety, such as drawing and coloring to educate students about road safety in an engaging and memorable way. Through demonstration, students are shown the significance of traffic signals in regulating traffic flow and enhancing pedestrian safety. The teachers also set up mini –intersections, complete with traffic signals, traffic signboards and zebra crossing, where students learnt “how to obey traffic signals, look for approaching vehicles before crossing the road and always cross the road using zebra crossing.”

Students were also taught a song on traffic signal

“Twinkle – twinkle traffic light

On the corner shining bright”

Red means “stop “

Yellow means “slow “

Green means “go“

Through these activities, students not only gained knowledge about road safety but also developed a sense of responsibility towards their own safety as well as others also while on the road.
